-----	--------	--	----------

(a) In accordance with Section 326 of P.L. 102-484, the Government is prohibited from awarding any contract which includes a specification or standard that requires the use of a Class I ozone-depleting substance (ODS) identified in Section 602(a) of the Clean Air Act, 42 U.S.C. 7671a(a), or that can be met only through the use of such a substance unless such use has been approved, on an individual basis, by a senior acquisition official who determines that there is no suitable substitute available.

(b) To comply with this statute, the Government has conducted a best efforts screening of the specifications and standards associated with this acquisition to determine whether they contain any ODS requirements. To the extent that ODS requirements were revealed by this review they are identified in Section C with the disposition determined in each case.

(c) If offerors possess any special knowledge about any other ODSs required directly or indirectly at any level of contract performance, the U.S. Army would appreciate if such information was surfaced to the Contracting Officer for appropriate action. To preclude delay to the procurement, offerors should provide any information in accordance with FAR 52.214-6 or 52.215-14 as soon as possible after release of the solicitation and prior to the submission of offers to the extent practicable. It should be understood that there is no obligation on offerors to comply with this request and that no compensation can be provided for doing so.

DEC/1997

(a) Section I of this document contains DFARS clause 252.211-7005, Substitutions for Military Specifications and Standards, which allows bidders/quoters/offerors to propose Management Council approved Single Process Initiatives (SPIs) in their bids/quotes/offers, in lieu of military or Federal specifications and standards cited in this solicitation.

(b) An offeror proposing to use an SPI process under this solicitation shall identify the following for each proposed SPI as required by DFARS 252.211-7005 contained in Section I:

SPI	MILITARY/FEDERAL SPEC/STANDARD	LOCATION OF REQUIREMENT	FACILITY	ACO

(d) In the event an offeror does not identify any SPI in paragraph (b) above, the Government shall conclude that the bidder/quoter/offeror submits its bid/quote/proposal in accordance with the requirements of this solicitation.

(e) The price that is provided by the offeror in the Schedule in Section B will be considered as follows:

(2) If there is no SPI identified in paragraph (b) above, the Government will presume the price is predicated on the requirements as stated in the solicitation.

(f) Bidders/quoters/offerors are cautioned that there is always the possibility that the Government could make a determination at the Head of the Contracting (HCA)/Program Executive Officer (PEO) level that the proposed SPI is not acceptable for this procurement. If such a determination is made, and the bid/quote/offer only identifies a price predicated on use of proposed SPI, the bid/quote/offer will be determined nonresponsive. Bidders/quoters/offerors who propose SPI processes are encouraged to provide a price below to reflect their price for the item manufactured in accordance with the requirements as stated in this solicitation to preclude possibly being determined nonresponsive:

Name of Offeror or Contractor:

This certification concerns a matter within the jurisdiction of an agency of the United States and the making of a false, fictitious or fraudulent certification may render the subject to prosecution under section 1001 title 18 United States Code.

(b) The Offeror shall provide immediate written notice to the Contracting Officer if, at any time prior to contract award, the Offeror learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

(c) A certification that any of the items in paragraph (a) of this provision exists will not necessarily result in withholding of an award under this solicitation. However, the certification will be considered in connection with a determination of the Offeror's responsibility. Failure of the Offeror to furnish a certification or provide such additional information as requested by the Contracting Officer may render the Offeror nonresponsible.

(d) Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render, in good faith, the certification required by paragraph (a) of this provision. The knowledge and information of an Offeror is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

(e) The certification in paragraph (a) of this provision is a material representation of fact upon which reliance was placed when making award. If it is later determined that the Offeror knowingly rendered an erroneous certification, in addition to other remedies available to the Government, the Contracting Officer may terminate the contract resulting from this solicitation for default.

Section L - Instructions, Conditions, and Notices to Offerors

L.1. Submission of Information

Proposals shall be submitted in accordance with this section. Proposals should be specific, complete, and state clearly how you will meet the requirements of the solicitation. Sufficient substantiation should be submitted to permit the Government to determine that your offer meets all the requirements of the solicitation. The following factors will be used to determine the best overall proposal, Bid Samples and Technical proposals (Go/No Go), Past Performance, Small Business Participation, and Price. Failure to provide the required supporting documentation may result in your offer being rejected.

This solicitation requires access to a secret specification for the laser filter. The classified Laser Protection Performance Specification is restricted to U.S. firms ONLY. Offerors that do not meet the requirement cited in Attachment 001 (Department of Defense Contract Security Classification Specification) cannot receive the secret specifications for the laser filter and will not be eligible to submit a proposal or bid samples. Any bid samples or proposals received from an ineligible offeror will be returned without evaluation.

L.2. BID SAMPLES: The offeror shall submit three identical M144 Telescope bid samples. Bid samples will be evaluated based on the Test Plan for M144 Telescope Bid Samples (Attachment 008). Bid samples will be shipped at the offerors expense to: TACOM-Rock Island, ATTN: AMSTA-LC-CSCC/Ms. Ellen Bartz, Rock Island, IL 61299-7630. Bid samples will be returned to unsuccessful offerors at the Governments expense. Offerors shall provide three copies of any available literature, operator and maintenance manuals, warranty information, and parts listings, along with the bid samples.

L.3. TECHNICAL PROPOSALS: In addition to the bid samples, the offeror shall provide a written technical proposal providing detailed technical information (engineering drawings, plans, designs) for each requirement described below:

L.3.1. PD Paragraph 3.19 Operational Temperature. The telescope shall have no damage after a two-hour exposure to temperatures of -40 degrees C and +49 degrees C (-40 degrees F and +120 degrees F). The telescope's focus and zoom mechanisms shall operate freely by hand at these temperatures.

The lubrications commonly used in the commercial market become too viscous at minus 40 degrees C, thus binding the optical adjustments. The offeror shall address this issue to assure that the mechanisms will operate at extreme cold temperatures.

L.3.2. PD Paragraph 3.22 Anti-reflection Device (ARD) Interface. The ARD currently within the Army stockpile system (NSN 6650-01-456-4526) shall attach to both the objective lens of the telescope and LFU (see Note 6.2). The ARD shall attach and detach without the use of tools (fingers only) and shall take no more than 20 seconds to attach and remove after two hours at each of the following temperatures: minus 25 degrees C, room temperature and plus 49 degrees C.

The offeror shall provide information that demonstrates technical coordination with Tenebraex Corp. and that a rigid interface will be achieved that takes no more than 20 seconds to attach and remove.

L.3.3. PD Paragraph 3.23 Telescope shall include an threaded LFU per addendum C (Laser Filter Unit for the Telescope, Straight M144) and shall attach and detach without the use of tools (fingers only) and shall take no more than 20 seconds to attach and remove after two hours at each of the following temperatures: minus 25 degrees C, room temperature and plus 49 degrees C.

The offeror shall provide a dimensioned interface drawing showing thread type and pitch to assure that the LFU mates to the M144 objective lens housing.

Name of Offeror or Contractor:

L.3.4. PD Paragraph 3.24 Shipping/Storage Case. The M144 shall be provided with a hard shipping/storage case. The case shall be the case currently within the Army stockpile system (NSN 5855-01-246-6805) or an approved alternative and shall provide for storage of the soft carrying case (Addendum B) when the soft case contains telescope, LFU, and tripod (Addendum A). A foam cutout shall be provided per this configuration. See Note 6.2.1.

The offeror shall identify the case manufacturer and plan to deliver a proper hardware foam cutout.

L.3.5. PD Addendum A Paragraph 3.5 Dovetail Mounting Head. The telescope, as described in the Purchase Description for the Telescope Straight M144, shall attach to the tripod using a dovetail sliding type design with a locking clamp type mechanism. One mate of the dovetail shall be screw attached to the tripod head. The other mate of the dovetail shall be screw attached to the telescope body. The telescope shall attach to the tripod head with one smooth motion in a single direction. A thumb-activated clamp, forming part of the quick release mount shall secure the sliding dovetail.

A detailed design and technical description shall be provided.

L.3.6. PD Addendum A Paragraph 3.12 Weight Support. The tripod, with legs fully opened, shall be capable of supporting a weight of 34 kg (75 lb) without damage.

The offeror shall provide test data, if available, supporting a claim to meet this requirement or technical design information that considered this requirement.

L.3.7. PD Addendum B Paragraphs:

3.2. Provide storage for M144 Telescope, Tripod and LFU as described in the Purchase Description: Telescope, Straight M144

3.3. Provide a separate storage for the telescope with the LFU attached.

3.4. Provide a separate compartment for the Tripod.

3.5. Provide a separate compartment for the Laser Filter Unit.

3.6. Telescope, LFU and Tripod shall be secured and in case and shall not be free to move, rattle or roll.

Offeror shall provide a detailed description of the Soft Carrying Case addressing each of the above requirements.

L.3.8. PD Addendum C (Classified at the Secret level). The offeror shall provide a technical proposal addressing the following:

The unclassified terms in Addendum C that include: Band 1, Band 2, Band 3, Lambda 1 and Lambda 2 are provided for your convenience to report and document in unclassified formats. There shall be no mention of specific wavelength bands, laser wavelengths, rejection levels, optical densities, specific test lasers and/or laser makes and models. Photopic and Scotopic transmission curves shall not include any wavelength scale. Failure to follow these guidelines may result in a breach of security and appropriate Government action against the offeror. The offeror shall identify the following: the facility/subcontractor where the optical coatings will be designed and vacuum deposited; any facility planned for special filter testing (laser damage, optical density etc.). The offeror shall also describe the experience of the facilities/personnel in the design, manufacture and testing of similar laser filters (manufactured to classified specifications issued by TACOM-ARDEC/RI) to protect fire control optical instruments.

L.4. PAST PERFORMANCE.

Contract References: The offeror shall submit with its initial proposal contract references representing its recent, relevant performance under Government and/or commercial contracts. The offeror shall submit no more than five contract references.

Recent means any contract under which any performance, delivery, or corrective action has taken place within the last 3 years of the issuance of this solicitation.

Relevant means performance that demonstrates the offeror has successfully manufactured or provided the M144 Telescope or similar optical devices.

The following information is required with respect to each contract reference:

SECTION M - EVALUATION FACTORS FOR AWARD

M.1. BASIS FOR AWARD

The award of a contract will be made to the offeror whose proposal offers the best overall value to the Government based on an integrated assessment of the non-price and price factors. The evaluation factors include: Bid samples and Technical proposals, Past Performance, Small Business Participation, and Price. Bid Samples and Technical proposals shall be rated as Go/No Go using the Test Plan for M144 Telescope Bid Samples. The Past Performance and Small Business Participation factors will be rated in an adjectival and

CONTINUATION SHEET	Reference No. of Document Being Continued PIIN/SIIN DAAE20-01-R-0207 MOD/AMD	Page 42 of 45
---------------------------	---	----------------------

Name of Offeror or Contractor:

narrative manner. The non-priced factors of Past Performance and Small Business Participation, combined, are approximately equal to Price.

Proposals that fail to meet the established criteria for the bid samples and technical proposals (No-go) will not be evaluated any further, and will not be considered for award. Only those proposals that are determined a GO in the bid samples and technical proposal areas will be further evaluated in the past performance, small business participation, and price factors.

Selection of the successful offeror shall be made following an assessment of each proposal against the solicitation requirements and the criteria below. The criteria contained herein shall be used to evaluate and assess the information provided by the offerors in response to the information called for in Section L of the RFP.

Any proposal which is unrealistic in terms of technical proposal, schedule commitments, or Price factor, will be judged either as exhibiting a lack of competence or failure to comprehend the Governments requirements and may be so evaluated and rated, or rejected for such reasons. Furthermore, any significant inconsistency between proposed Technical, Past Performance, and Small Business Participation Factor performance, and the Price factor, if unexplained, may be grounds for rejection of the proposal due to an offerors misunderstanding of the work required or the inability to perform any resultant contract. The Government will evaluate each proposal strictly in accordance with its content and will not assume that performance will include factors not specified in the offerors proposal.

The Price factor and non-Price factors of each proposal will be evaluated. However, the closer the offerors evaluations are in the non-Price factors, the more significant the Factor of Price becomes in the decision. Notwithstanding the fact that the Price factor is not the most important consideration, it may be controlling when:

- (1) two or more proposals are otherwise considered equal;
- (2) an otherwise superior proposal is unaffordable; or
- (3) the advantages of a higher rated, higher priced proposal are not considered to be worth the cost premium.

M.1 EVALUATION CRITERIA:

Bid Samples/Technical Proposals: Bid samples will be evaluated based on Attachment 001, Test Plan for M144 Telescope Bid Samples. If an offerors bid sample fails to meet the criteria in the Test Plan, they will be eliminated from further evaluation and shall be notified by the contracting officer as such. If an offerors technical proposal fails to meet the criteria indicated in Section L and the M144 Purchase Description, they will be eliminated from further evaluation immediately and shall be notified by the contracting officer as such.

Standards for both the bid samples and technical proposals are:

Go: The offerors bid sample and technical proposal clearly meets or exceeds the requirements contained in the Test Plan for M144 Telescope Bid Samples and the M144 Telescope Purchase Description.

No-Go: The offerors bid sample and technical proposal fails to meet the requirements contained in the Test Plan for M144 Telescope Bid Samples and the M144 Telescope Purchase Description.

M.2. PAST PERFORMANCE

Past performance information is evaluated as a predictor of future contract performance. Using past performance information for each offeror, the Government will assess the probability that the instant requirement will be successfully completed in accordance with contract terms.

In evaluating performance history, the Government may review the offerors current and prior performance record of complying with all aspects of its contractual agreement: conformance to technical requirements; timeliness of deliveries/performance and quality of performance.

In conducting the past performance evaluation, the Government may use information obtained from other sources.

The Government may consider the currency, degree of relevance, source and context of the past performance information it evaluates as well as general trends in performance, and demonstrated corrective actions.

A significant achievement, problem/problem resolution or lack of relevant data in any element can become an important consideration in the selection process.

Name of Offeror or Contractor:

A negative finding in any element may result in an overall high-risk rating.

The Government may also consider past performance information regarding predecessor companies, key personnel, other corporate entities or subcontractors where such information is relevant to this acquisition.

Offerors past performance will be rated as follows:

Very Low Risk: Based on the offerors past performance, very little doubt exists that the offeror will successfully perform the required effort.

Low Risk: Based on the offerors past performance, little doubt exists that the offeror will successfully perform the required effort.

Moderate Risk: Based on the offerors past performance, some doubt exists that the offeror will successfully perform the required effort.

High Risk: Based on the offerors past performance, significant doubt exists that the offeror will successfully perform the required effort.
